Flag: Follow up

FYI... Steve Eggers comments from the Prospectus review. Appears berms are needed to prevent flooding on adjacent properties. However, he points out that the hydrology PS shouldn't be different despite this being a surface water driven site, rather than a groundwater driven site. He seems to think that a flashy hydroperiod here would still be able to meet our typical hydrology PS.

Subject: Notes from this mornings IRT meeting - Big Hollow

Tom and Kerryann,

I summarized our discussion this morning and drafted notes for each of the items we talked about. Please let me know if I missed anything or mischaracterized our discussion on any of these points. Once we finalize our notes, I'll reach out to Jeff Kraemer (Heartland) and Dale Clark (sponsor) to set up a meeting for all of us to go through their response and provide our IRT feedback.

Thanks,

Eric Norton
